WHITEPAPER V1.1

WINDOGE95 Introduction

...You press the "switch on" button on your desktop...You go to make a cup of coffee and your computer is still loading the Windows 95 operating system.

insert windows audio

...You do not care about the wait..(Back in the day there were also hectic days)...You know you could trust your operating system!..Patience is the key!

...You take one sip from your cup of coffee and before you start working you decide to play for 10 minutes an arcade game! Ahhhh....The thrill!!! The "Go right Button" is always pressed am i right? Otherwise how can you prove yourself as a retro gamer?

...Ah the times....you insert the floppy disk (Youngsters look it up!), wait for the boot...Again, you do not care, because patience is the key!

...Time goes by, you learn about crypto...You learn about DOGE!!! So much Woof Woof!

...Now you are into Decentralized Finance, you hear about reflection tokens and elastic supply...

...Do you know what you have not forgotten? The simple times...When you could get a cup coffee while switching on your trusted operating system and play for a little while your favourite arcade game!

In Windoge95 we bring back this gaming nostalgia! We keep up with the needs/evolution of the market, while retaining the so needed nostalgia and calmness from the past!

"Let the Arcade Games, Begin"

How does Windoge95 reflection mechanism work?

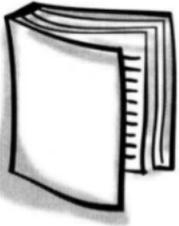

You get rewarded in \$DOGE instead of tokens. The token contract employs a static rewards system.

- The contract keeps track in an array of all token holders.
- The contract keeps an index into the array for processing.
- Every transaction processes a certain number of users, depending on the transaction size (bigger token transfers can process more, since the gas will still be proportionally less than the value of the tokens).
- The token is based on a Dividend-Paying Token Standard, which means all \$DOGE the contract gains will be split equally proportionally to the token holders.
- When a user is processed, the contract checks how many withdraw-able dividends they have, and if it is above the minimum threshold for auto-claims, will either automatically claim those dividends for \$DOGE, or automatically buy back tokens for them.

This system is fully automated and doesn't add minimal gas fees proportional to value transferred.

The number of holders processed through each transaction is dynamic and based on transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair system, fully automated.

In Windoge95 there is no minimum amount of total supply you have to hold in order to receive \$DOGE distributions. You only need to Activate your wallet to be eligible.

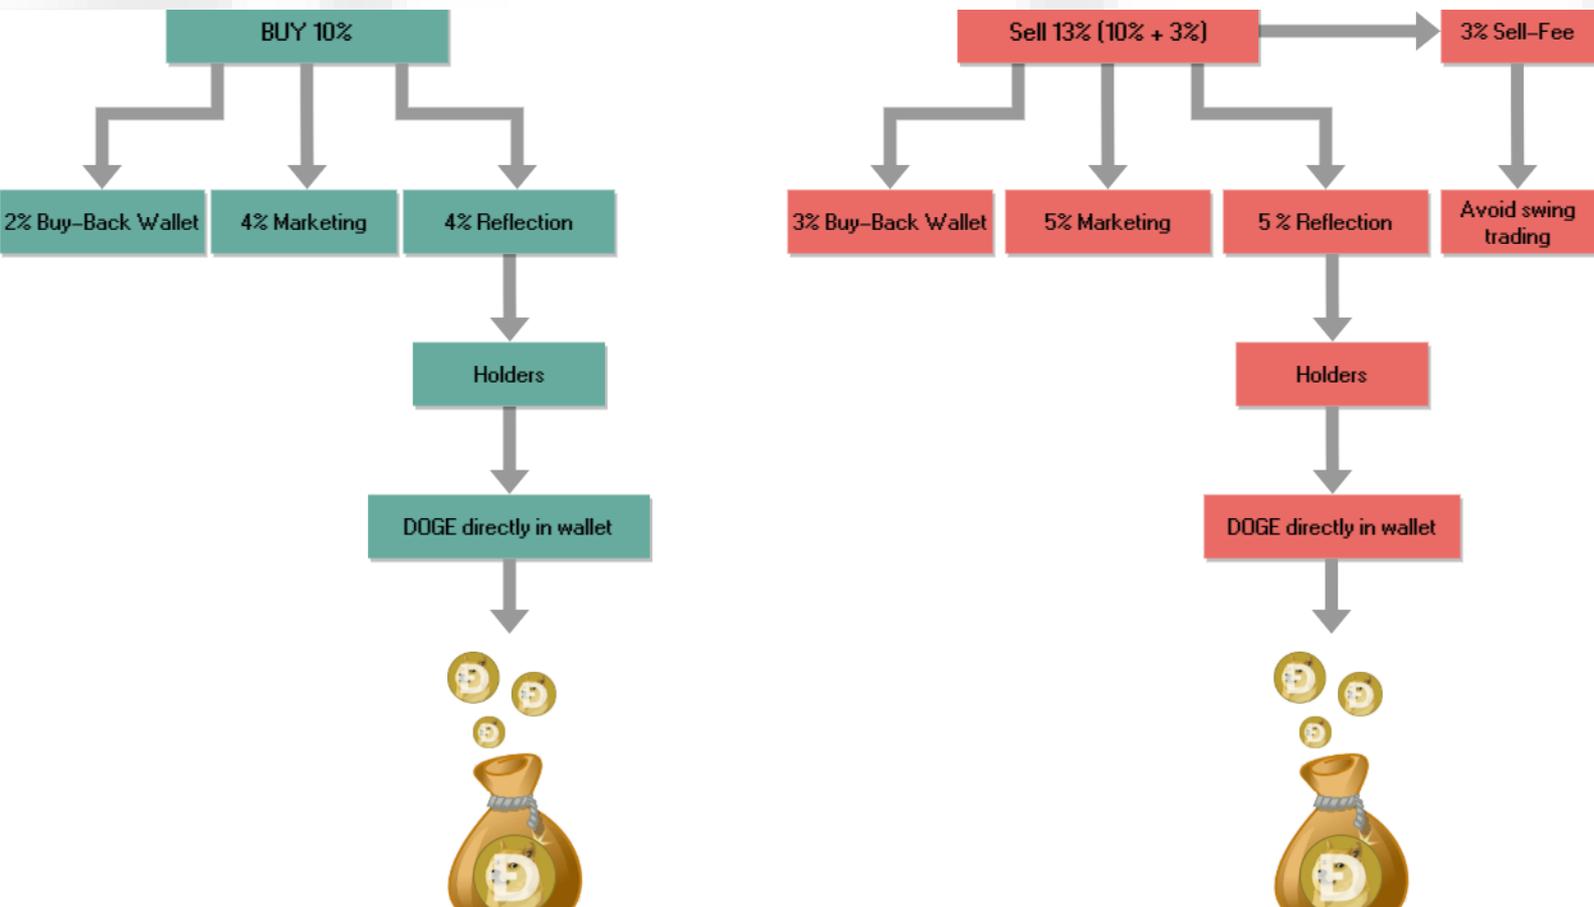

Let's Keep it Simple.

What could be more simple than a flowchart? As we said, we long for the old/simpler times...

A buy tax of 10% is implemented.

- 2% Goes to a Buy - Back Wallet. This gives the team the unique chance to buy back and burn and also put into Liquidity.
- 4% Goes to Marketing to fuel our Nostalgia.
- 4% Is our Reflection in \$DOGE rewards.

A sell tax of 3% is put upon the 10% buy tax , making it a total of 13%. These 3% is equally distributed to 3 portions (Buy-Back Wallet, Marketing, Reflection).

Play Arcade Games

We cannot bring back the nostalgia of the good old times, if we don't implement playable arcade games!

Come to Windoge95 and prove you are a retro arcade gamer!

How?

Check the website as we will always develop more and more!

Will you be the Arcade champion?

Token Information

Network: Binance Smart Chain (BEP-20)

Tokenname: WINDOGE95

Ticker: WNDG95

Contract address: 0x956ca51cc658835ca589eba83fe0ae12e5b7e5e5

Decimals: 9

TOTAL SUPPLY : 1,000,000,000 \$WNDG95

- TOKENS FOR PANCAKE LIQUIDITY : 10% of total supply
- TOKENS BURNT BEFORE LAUNCH : 90% of total supply

Other features

Anti-Whale

No project wants whales that are able to dump large amount of tokens. \$WNDG95 fixed this issue by setting max wallet allowance to 1% of the total supply.

Extra 3% Sell fee

Swing trading is a common practice that can affect price action. To incentive holders and reducing pump/dump dynamics, we added an extra 3% sell fee on top of the initial 10% transaction fee. Total sell fee = 13%.

Conclusion

Windoge95 is reflection token on binance smart chain with \$DOGE rewards.

Max Wallet prevents whale formation and the sell tax fee discourages swing traders.

The reflection mechanism will give \$WNDG95 Holders one more reason to hold!

Participate in our Arcade Games and be the Arcade Champion.
